

RCMI@Morgan Investigator Development Core

Presents the first part of the Grant Writing Workshop Series

“Getting Started on your First Research Proposal” June 2 – June 30, 2026

What is it?

This workshop will teach individuals with no prior NIH funding or grant experience how to design an NIH style scientific research proposal, focusing on basic biomedical research or health disparities research, over the course of a 4-week online summer workshop.

Workshop participants will meet on **Zoom** for a **2-day kick-off on Tuesday June 2nd and Wednesday June 3rd (3 hours each, from 1 to 4 PM)**. This will be followed by 4 weekly, synchronous, 2 hours-long Zoom meetings (time TBD by consensus).

Participation in the workshop will require completion of weekly assignments, between online meetings. The anticipated weekly time commitment will be about 10-12 hours.

What are the objectives?

Upon completion of this workshop participants will be able to:

- Compose a concise, testable research question focusing on basic biomedical research or research on health disparities.
- Delineate the overall significance and innovative aspects of their research question and define the health benefits that the research will generate, short or long-term.
- Support their research question with a review of relevant research literature.
- Construct a study design that appropriately tests their research question.
- Negotiate federal grant information and identify programs of interest to them.

Who can apply?

Early-stage investigators (new tenure-track faculty or postdocs) at MSU who:

- are working the biomedical, translational or behavioral health sciences or other public health related fields.
- have not previously received an RCMI Pilot Project Program award.
- have not previously been funded by any federal funding agency.
- intend to submit a grant proposal within the next year*.

New this year!!! We are also inviting community members who plan to partner with MSU faculty on **Community Based Participatory Grant (CBPR)** grant applications.

Applicants accepted into the workshop will be notified by May 22, 2026.

What is expected of applicants?

- Complete the application form to provide information about the topic of interest.
- Complete pre-workshop tasks upon acceptance to the workshop.
- Submission of all assignments on a weekly basis.
- Completion of the final product by end of the workshop.

Registration Deadline: May 18, 2026
